For convenience there is a Canada Customs Invoice available for the shipper. **This is the shipper's responsibility to fill out and include with the shipments going into Canada if customs are not already provided.**

Templates can be created for shipments that occur on a regular basis. If using templates, please make sure the information is accurate before completing. This is not necessarily a shortcut for all shipments but may cut down on time if you ship a lot to the same location. Be sure if you use templates any edits are made before the order is submitted to S&S Transport for scheduling.

Filters are made for searching. Click on these to search for specific orders. You can use any of the fields with a filter behind it to search by.

- Tracking shipments can be done by clicking on the S&S Tracking on the left side of the screen.
